Sprint Planning

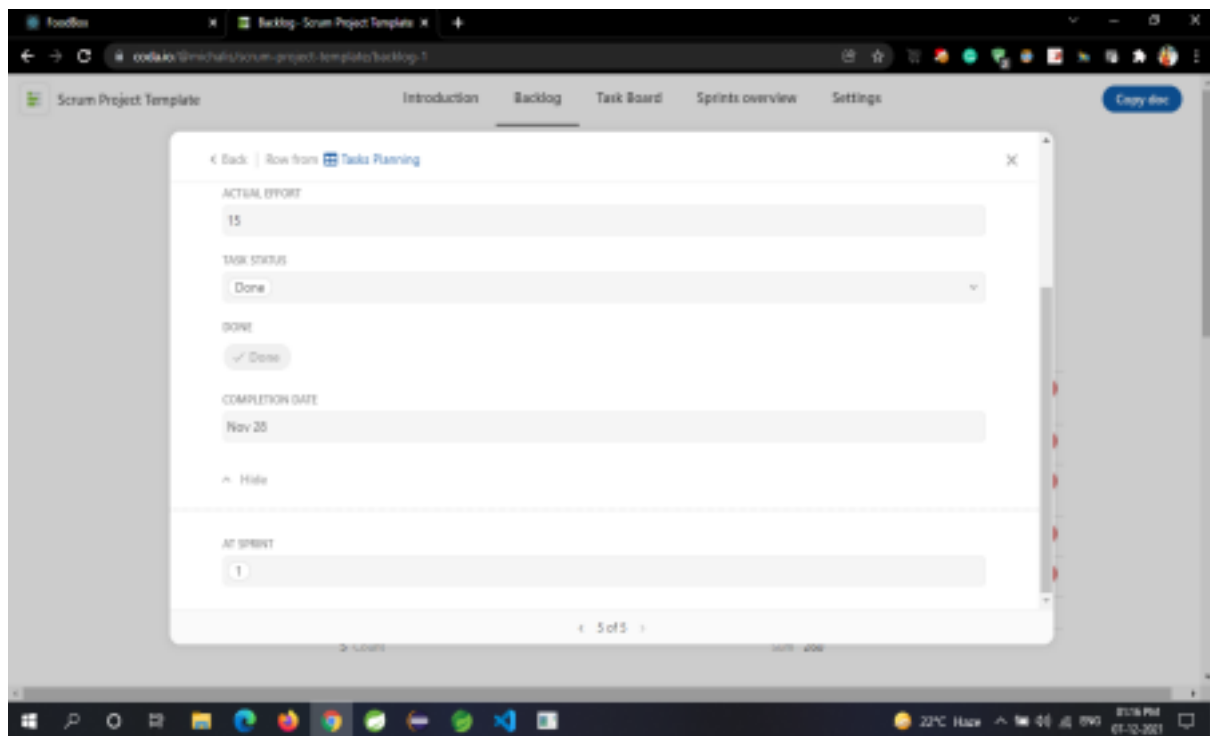

Sprint 1:

The top screenshot shows a web application interface for 'Sprint Planning'. The main window is titled 'Sprint Planning' and has tabs for 'Introduction', 'Backlog', 'Task Board', 'Sprints overview', and 'Settings'. A 'Copy doc' button is in the top right. A modal window titled 'Row from Product Backlog' is open, showing a form with the following fields:

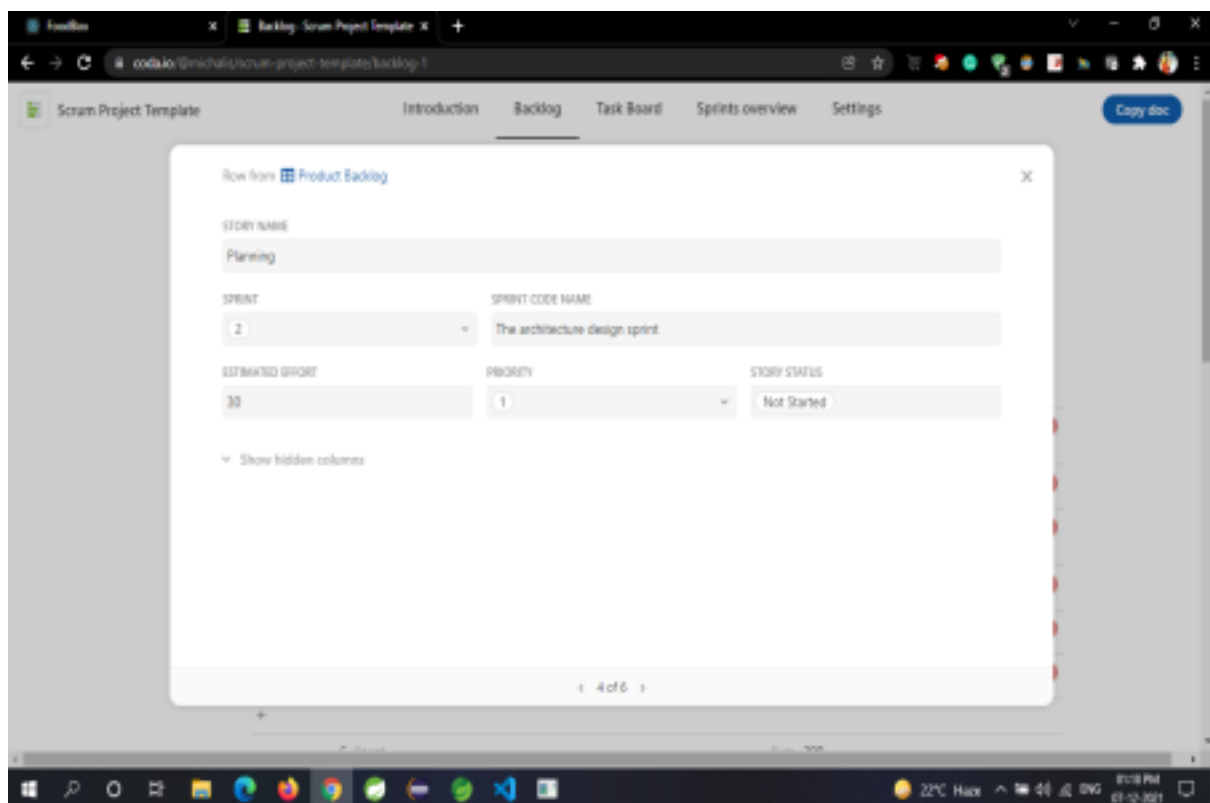

- STORY NAME: Design Thinking
- SPRINT: 1
- SPRINT CODE NAME: The Let's see what's it about sprint
- ESTIMATED EFFORT: 15
- PRIORITY: 1
- STORY STATUS: Not Started
- TASK STATUSES: 1
- STORY STATUS VALUE: 1

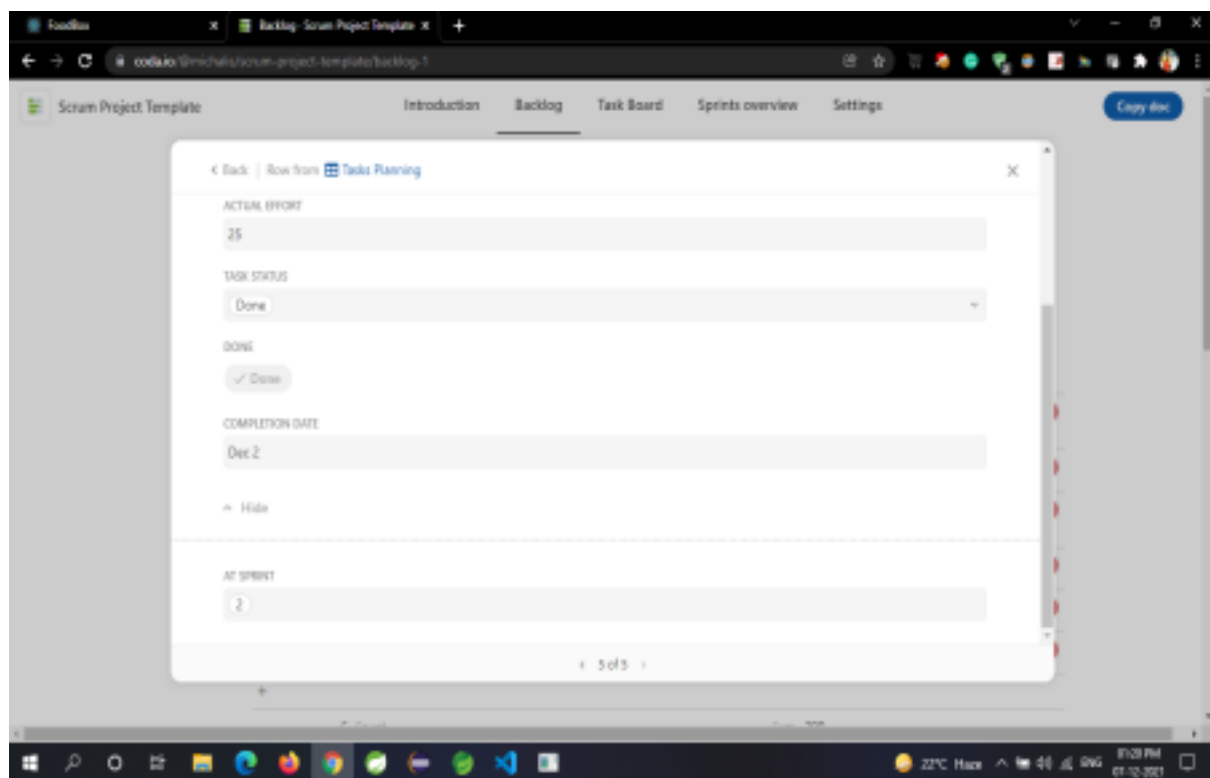

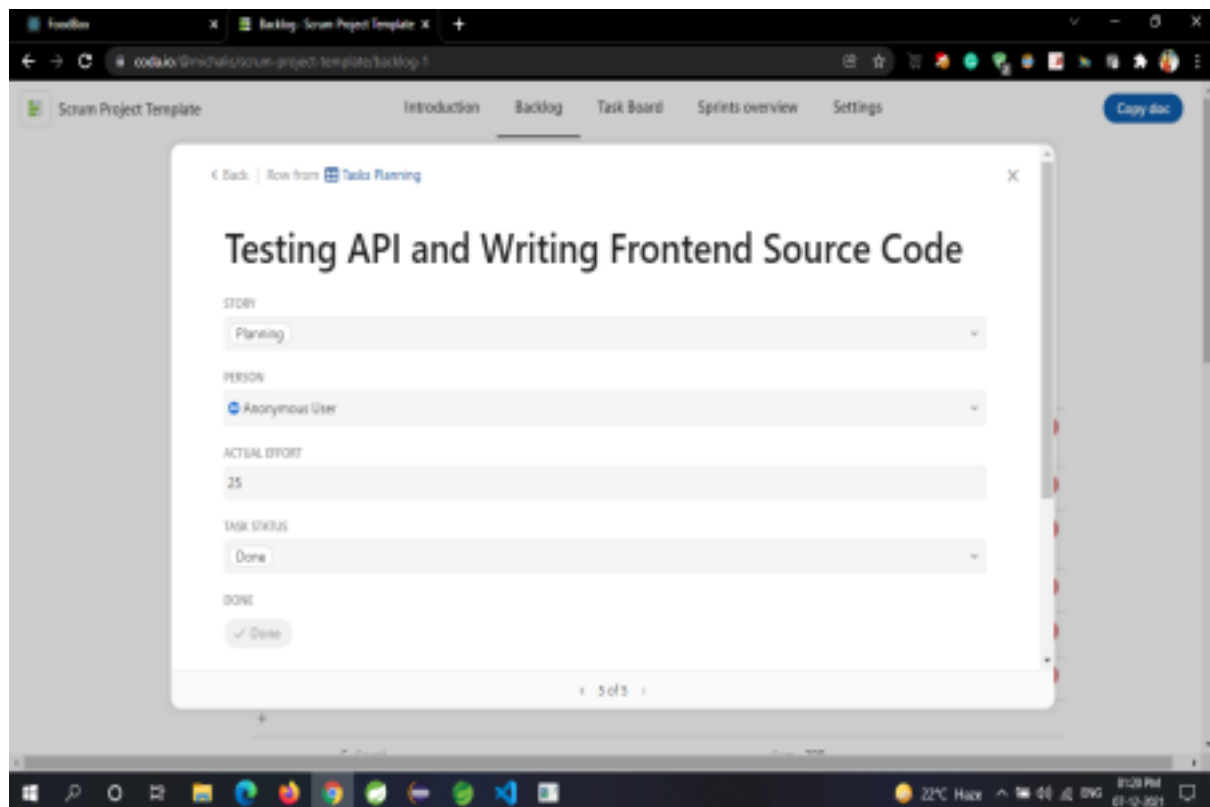

The bottom screenshot shows the same web application interface, but the modal window is titled 'Flow Chart and Backend Source Code'. It has a 'Back' button and a 'Row from Task Planning' header. The form fields are:

- STORY: Design Thinking
- PERSON: Anonymous User
- ACTUAL EFFORT: 15
- TASK STATUS: Done
- DONE: ☒ Done

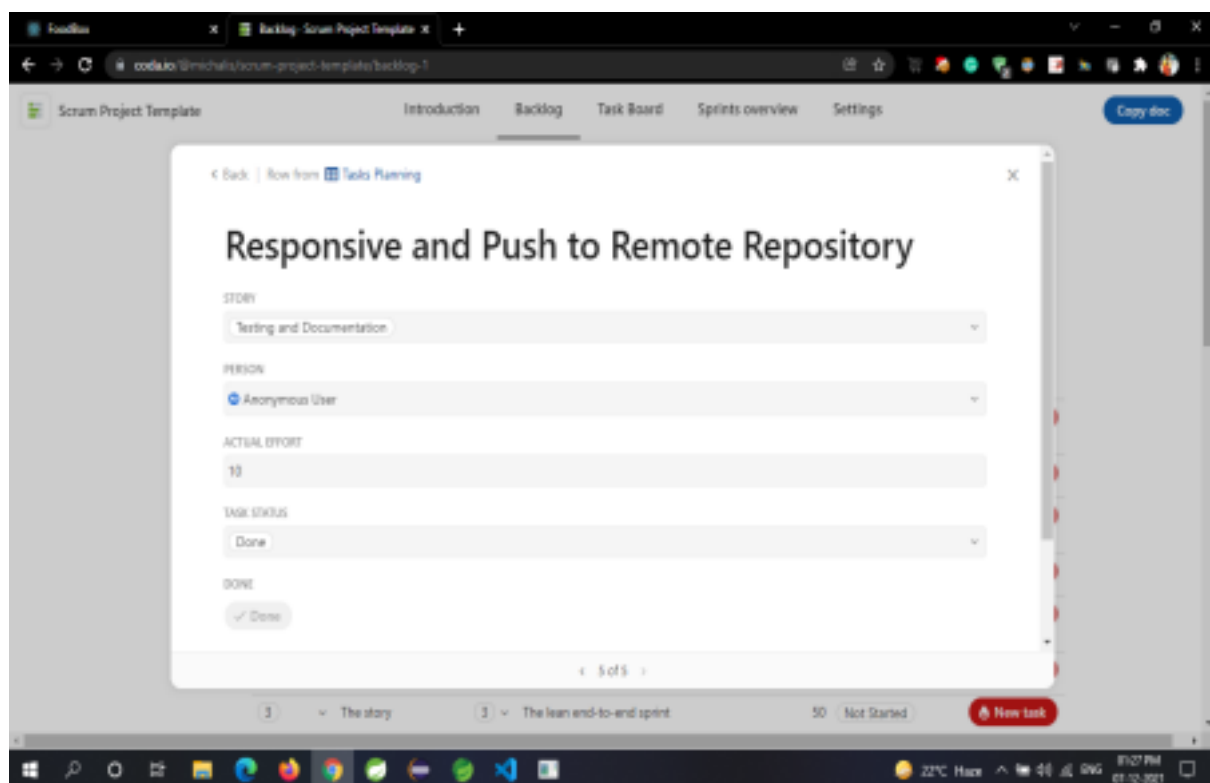

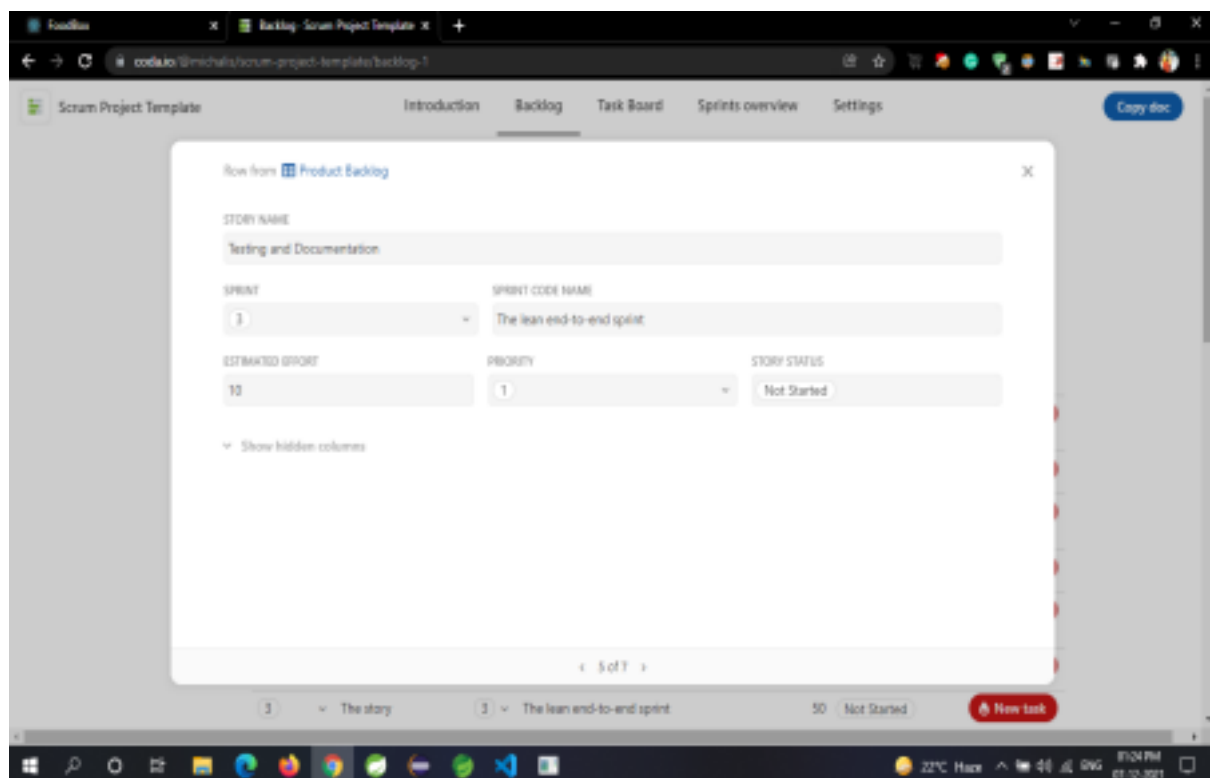

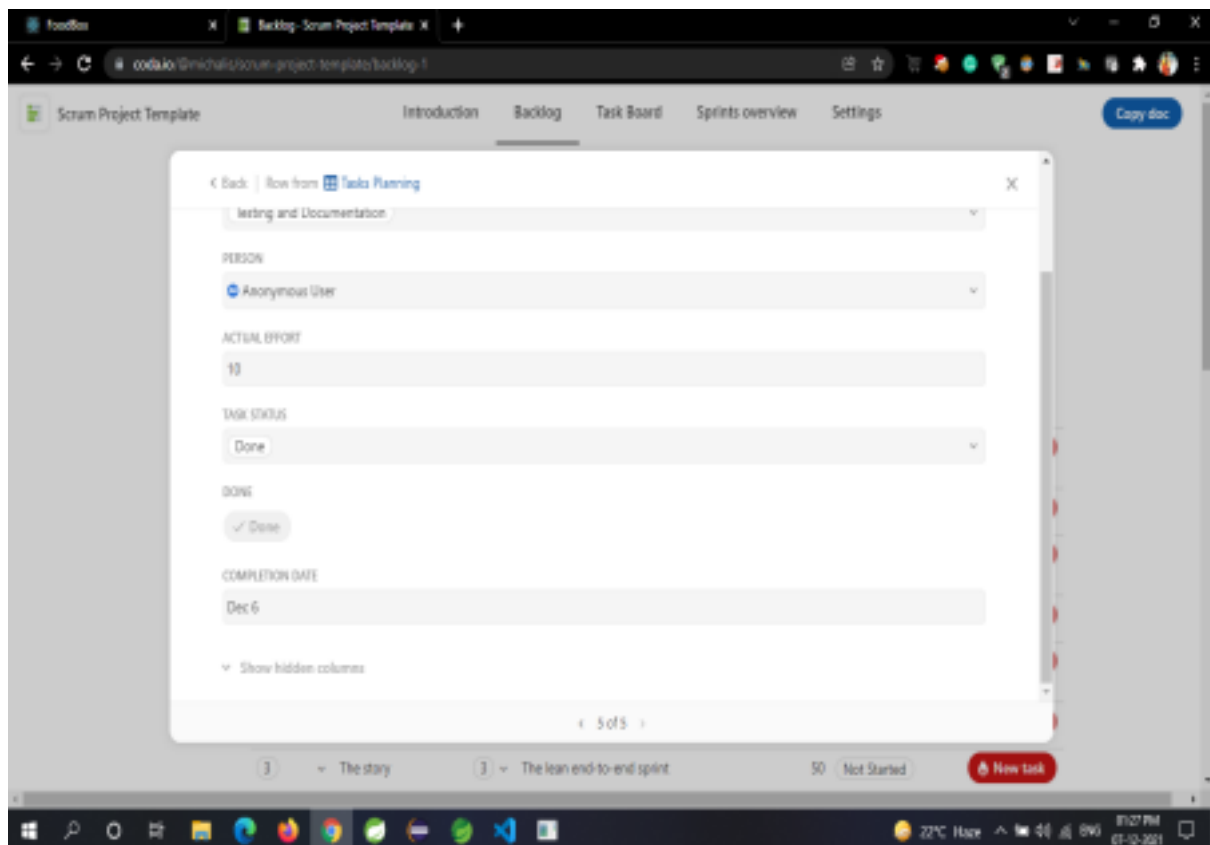

Sprint 2:

Sprint 3:

Core Concepts Used in the Project

- Java
- Spring Boot
- JPA
- Postman
- MySQL database
- Reactjs
- Bootstrap, HTML, CSS
- Redux
- Github

Application API on Postman
